

Neighborhood in Focus:
Kingsway West

Hello Kingsway West Neighborhood Resident:

As part of PIER (Prevention, Intervention, Enforcement, and Re-Entry), the City's Comprehensive Crime Plan, we are focusing efforts on 15 neighborhoods – Kingsway West Neighborhood– is one of them. The following pages contain graphics focusing on health data to help move conversations away from emotion and ground them in facts. This “Neighborhood In Focus” also highlights health needs identified in the Kingsway West Neighborhood and available resources to help meet those needs.

Crime is influenced by many factors in the community. The Center for Disease Control has identified some aspects of crime -- such as violence -- as a public health concern. This calls for a public health response.

Kingsway West Neighborhood has a lot of positive attributes that have formed its history and will help us to provide the basis for an even better future. The City of St. Louis Department of Health (DOH) hopes will be able to use this “Neighborhood In Focus” guide for your neighborhood improvement discussions.

Let us know what you think.

Sincerely,

Melba R. Moore, MS, CPHA
Acting Director / Commissioner of Health

THE PROBLEM

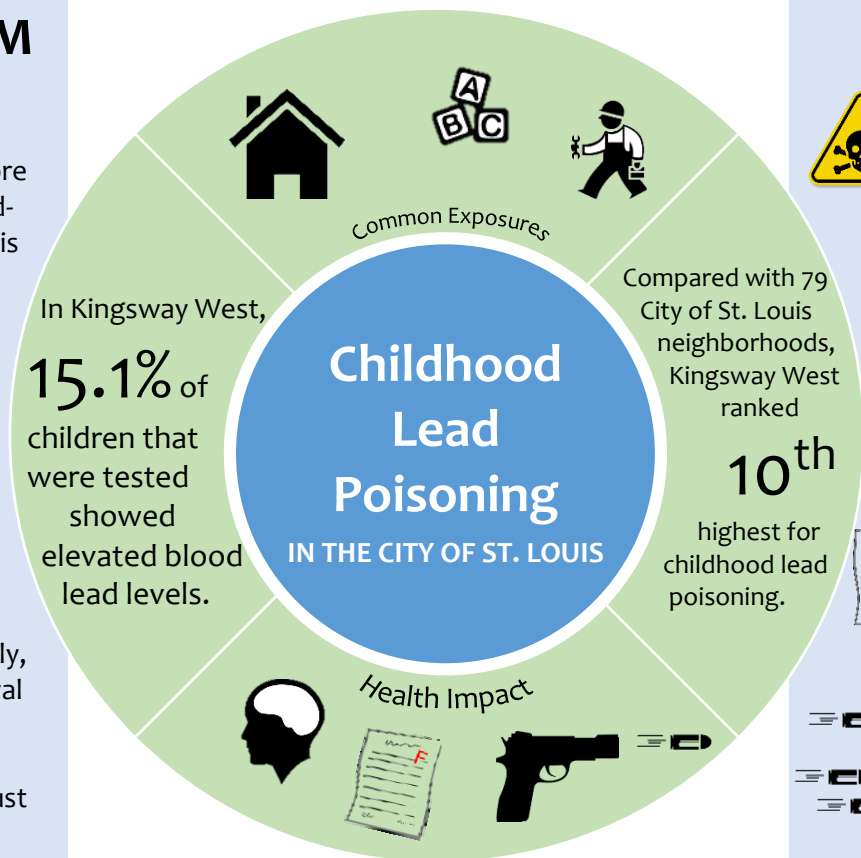

Many St. Louis homes built before 1978 contain lead-based paint that is deteriorating.

Small amounts of lead dust or chipped paint can be enough to cause lead poisoning.

If done incorrectly, lead paint removal can expose the lead and cause contaminated dust to be airborne.

THE IMPACT

Lead can be ingested, inhaled, or absorbed through the skin, causing lead poisoning.

Lead poisoning causes damage to the brain, causing learning disorders, and hearing problems.

Lead-exposed children may perform poorly in schools and tend to drop out.

A growing body of evidence in the social and medical sciences traces high crime rates to high rates of lead exposure.

What the City of St. Louis Department of Health Can Do

We offer free blood lead level testing for your child.

We provide education on nutrition and cleaning techniques that can reduce lead exposure.

We offer free water testing for your home's plumbing.

What You Can Do

Get tested.

Talk with your child's doctor about a simple blood lead test.

Check your home.

Talk with us about testing paint and dust in your home for lead.

Remove the threat.

Discard any items in the house that may contain lead.

Renovate safely.

Use contractors certified by the EPA to prevent hazardous lead dust.

THE PROBLEM

The St. Louis metropolitan area consistently has rates of violence far higher than most other places in the United States – ranking 9th in the nation for number of youth murdered with guns in 2012.

KINGSWAY WEST

50 in 1000 residents experienced burglary, larceny, or vehicle theft.

37 in 1000 residents were victims of a violent crime.

4 in 1000 crimes reported involved drugs.

The health impact of CRIME IN THE CITY OF ST. LOUIS

Compared with 79 City of St. Louis neighborhoods, Kingsway West ranked:

- 53rd highest for property crime rates
- 8th highest for violent crime rates
- 39th highest for drug-related crime rates

HEALTH IMPACT

Violence is a serious public health problem. It affects people in all stages of life. Those who survive violence suffer physical, mental, and or emotional health problems throughout the rest of their lives.

VIOLENCE

- Violence is the leading cause of injury, disability, and premature death.
- Youth violence is the 3rd leading cause of death for young people (15-24 years).
- It also affects the health of communities.
